FUJI Factory

OUR HISTORY: DULAILA INTERNATIONAL AGENCY

FUJI JAPAN
ELEVATORS & ESCALATORS

Since the federation of seven Emirates was created, the subsequent boom in the construction industry in UAE caused huge demand of high quality building materials and state-of-the-art equipment. Being the recognized leader in this industry, Khamas Group of Investment Companies responded to this challenge by the establishment of their Equipment Supply Division. Carefully keeping their tradition and legacy in the machinery supplies and maintenance in the UAE, the Khamas also created a special engineering division under the leadership of Mr. Khalid Mohammed Yousef Bukhamas.

Dulaila International, well known as DIA, was founded in 1981. Our business in the vertical transportation industry has started in 1995, and we are proud to be the sole agent of Fuji & Fuji Japan Brand for elevators and escalators. Therefore, Fuji brand is our priority in service and maintenance.

We have supplied the Fuji & Fuji Japan elevators and escalators to various and prestigious projects in United Arab Emirates including Government Departments, such as Dubai Municipality Projects, Government of Dubai, Real Estate Dept. Development Board and Ministry of Public Works-Housing, Emaar, RTA, Ruler's Court. Lists of Fuji & Fuji Japan projects are enclosed to our Catalogue to give you a glance of our accomplished projects and our association with the reputed clients, contactors, and consultants here in UAE.

A WORD FROM CEO

We support our customers around the world throughout their project lifecycle, from the design through to the end-of-life phase. Every step of the way, we strive to fully understand their needs and consistently deliver the safest, highest quality passenger transportation solutions. Our capabilities include high-quality, customer-focused service as well as individual maintenance and modernization packages and we are looking forward to have a mutual business relationship in the nearest future.

KHALID KHAMAS

OUR PROJECTS

Since the company had established, our services covering all seven Emirates. We are managing a large number of projects in collaboration with various developers locally and internationally. Please visit our website www.fujijapan.ae and go through our list of Projects and Gallery for further details.

OUR TEAM

Our Company is managed by highly competent personnel having many years of experience in the elevator industry, offering services based on excellence, innovative solutions, notions and customer satisfaction. Our success and strength based in our dedicated team of qualified experienced and highly competent professionals and technical personnel who have strong proficiency in the elevator industry.

OUR COMPANY

DULAILA INTERNATIONAL, better known as DIA as the sole agent of FUJI & Fuji Japan Elevators and Escalators in all countries except Japan Taiwan & China, operates under the flagship (as a member) of KHAMAS Group of Investment Companies in Dubai. Fuji & Fuji Japan are Japanese Companies that are world renowned for its high quality and standards, customer satisfaction and highest safety, technologies, innovative design and engineering of elevators and escalators. Fuji was established in 1943 then Fuji Japan in 1976. Due to its success and huge demand of elevators and escalators worldwide, DIA had established in 1981 as a supplier and operator in United Arab Emirates and since 1995 our elevators and escalator business had started. The top priority of Fuji & Fuji Japan is to provide outstanding services, best quality, convenient terms and competitive price, high attention to all customers and best maintenance of the elevators and escalators.

OUR PROCESS

For the years, commercial establishments in the United Arab Emirates and neighbor regions rely on DIA to supply and maintain escalators and elevators.

During the years, our loyal customers appreciated our products, quality, services, delivery and prompt maintenance assistance.

The company's solutions are based on scientific analysis using state-of-the-art practices and project management techniques. Our technical capabilities and transparent development mechanism creates exceptional industrial benchmarks in the region.

Features

Feature	Description	Standard	Optional
■ Operation and Service Features			
Safe Landing (SFL)	If there is a malfunction and the elevator stops between floors, the controller performs a diagnostic check before moving the elevator to the nearest floor.	○	
Next Landing (NLX)	If the elevator doors cannot open fully at the destination floor for any reason, the doors will close and the elevator proceed to the next floor.	○	
Automatic Bypass (ABP)	A full-loaded car will bypass hall calls in order to maintain maximum operating efficiency.	○	
Overload Holding Stop (OLH)	The elevator buzzer rings to indicate the car is overloaded.	○	
Car Call Cancelling (CCC)	When a car responds to the final car call in one direction, the system automatically checks and cleans the remaining calls in another direction from memory.	○	
False Call Canceling --- Automatic (FCC-A)	If the number of the registered car calls does not correspond to the car load, all calls are canceled to avoid necessary stops	○	
False Call Canceling --- Car Button Type (FCC-P)	If the wrong floor button is pressed, it can be canceled by quickly pressing the same button again twice.	○	
Car Light/ Fan Shut Off-Automatic (CLO-A / CFO-A)	If there is no call within a preset time period, the car light/fan is automatically shut off to conserve energy.	○	
CMB	COP maintenance box	○	
Attendant Service (AS)	Exclusive operation where an elevator can be operated using the buttons and switches located in the car operating panel.		○
Non-Service for Specific Floors (NS)	To enhance security, service to desired doors can be set to disable using the car operational panel, a manual or timer switch. This function is automatic deactivated during emergency.		○
Out-of-Service Key Switch	With a key switch on hall panel, a car can be called to a specified floor after responding to all car calls, and then automatically be taken out of service.		○
Independent Service (IND)	A car can be used isolated from group control operation for maintenance or repair.		○
■ Group Control Features			
Continuity of Service (COS)	A car experiencing trouble is automatically withdrawn from group operation to maintain overall group performance.	○	
Automatic Hall Call Registration (FSAT)	If one car cannot carry all waiting passengers due to full load, another car will automatically dispatched for the remaining passengers	○	
Main Floor Parking (MFP)	An available car always parks on the main floor with the doors open to reduce the passenger waiting time	○	
Forced Floor Stop (FFS)	Each car in the elevator bank will stop at a specified floor on every trip – without being called.		○
Special floor priority service (SFPS)	Provides higher priority for car to a specified floor such as VIP room when a hall call is made at that floor.		○
Strategic Overall Spotting (SOHS)	To reduce passenger waiting time, cars which have finished service are automatically directed to positions where they can respond to predicted hall calls as quickly as possible.		○
Backup Operation for Group Control Microprocessor (GCBK)	The backup function installed in the system prevents the loss of group control due to failure of a microprocessor or transmission line.		○
Up Peak Service (UPS)	Controls the timing and distribution of cars assigned to meet traffic demand during increased upward service.		○
Down Peak Service (DPS)	Controls the timing and distribution of cars assigned to meet traffic demand during increased downward service.		○

Features

Feature	Description	Standard	Optional
■ Signal and Display Features			
Car Arrive Chime (AECC)	Electronic chimes sound to indicate that car will soon arrive (The chimes are mounted either on top and bottom of the car, or in each hall)	○	
Flashing Hall Lantern (FHL)	Hall lantern flashes to indicate that the car will soon arrive and its service direction.		○
Voice Synthesizer	Synthesized voice instruct the passengers for the information such as the current floor or service direction.		○
Media LCD Display	Showcasing information of Calendar (Date, Time, Week), Operation Status, Destination. Messaging / Play Picture / Video display and editing according to requests.		○
■ Door Operation Features			
Automatic Door-open Time Adjustment (DOT)	Door opening times are automatically adjusted depending on whether the stop was from the floor or the car.	○	
Reopen with Hall Button (ROHB)	While the doors are closing, they can be reopened by pressing the hall button.	○	
Repeated Door-Close (RDC)	Should an obstacle prevent the doors from closing, the doors will repeatedly open and close until the object is removed.	○	
Safety Door Edge (SDE)	Sensitive door edges detect passengers or objects during door opening or closing.	○	
Safety Ray (SR)	Two infrared-light beams cover the full width of the doors as they close to detect passengers or objects. (Cannot be combined with the Multi-beam Door Sensor feature.)	○	
Multi-Beam Door Sensor	Multiple infrared-light beams cover the full width of the door as it opens or closed to detect passenger or objects		○
Door Load Detector (DLD)	When excessive door load has been detected while opening or closing, the doors immediately reverse.		○
Door Hold Button (DHB)	A button in the car keeps the doors open for an extended period to allow loading and unloading of materials, luggage, etc.		○
Door Nudging Feature - With Buzzer (NDG)	A buzzer sounds and the doors slowly close when they have remained open for longer than the present period.		○
■ Emergency Operations and Features			
Auto Rescue Device (ARED)	In case of a main power supply failure, the lift stopped between two floors is moved to floor level, the automatic door is opened and passengers are out safely.	○	
Emergency Car Lighting (ECL)	Car lighting which turns on immediately when power fails to provide a minimum level of lighting within the car		○
Earthquake Emergency Return (EER-P/EER-S)	On activation of the seismic sensor, all cars will stop promptly at the nearest floor and park there with the doors open to facilitate safe evacuation of passengers.		○
Firefighter's Emergency (FE)	During a fire, when the fireman's switch is activated, all car calls and hall calls are canceled and the designated car returns immediately to a specified floor. To facilitate fire fighting and rescue, the car responds only to car calls.		○
Fire Emergency Return (FER)	On activation of a key switch or the building's fire sensors, all calls are canceled and all cars will immediately return to a specified floor and the doors open to ensure passengers safety.		○
Unintended Car Movement Protect (UCMP)	When the elevator is in leveling and the door is open, elevator detects unexpected move, UCMP security device immediately start protection, stop the elevator.		○
Supervisory System	The monitors will connect and control each elevator's status and operated by remote, using indicators and switches which are provided on request.		○
